

Instructions in preparation for Muscle Spindle Research Workshop on Thurs, 6th Aug 2026

1. Open the link: <https://github.com/SurabhiSimha/spindleModelTutorial/releases/tag/v1.0>
2. Scroll to the bottom.
3. If you do not have MATLAB, download and install `SpindleTutorialInstaller_mac.zip` (mac users) or `SpindleTutorialInstaller_win.zip` (windows users). This can take some time to install. So, better to do it in advance of the tutorial.
4. If you do have MATLAB, download `Source code (zip)` . It gives you access to extra material and scripts that you can edit yourself. You can also do #2.

That is all is required prior to the workshop. You are welcome to explore the readme and repository.
